

# People Management

## Summary

This course is designed for anyone working in a project team environment or engineers who see an increasing management component in their work, this course will equip participants with general people management skills to help one to deal with problems. It is suitable for people in a field of work that has a high technological content.

The course is composed of lectures and class exercises with ample opportunity for participant questions and discussions. Much of the class time is devoted to exercises in which participants, typically working in small teams, practice the skills being taught.

## Audience

This course is designed for (future) team leaders, (future) project managers, and software managers.

## Criteria

There are no prerequisites for this course. Some years of working experience is however recommended.

## Duration

2 days (4 modules).

## Remarks

None.
